

## How to Print Laser Checks with PROMPT Business System

1. The standard form is found at [www.deluxe.com](http://www.deluxe.com). Click on Business Checks and Solutions. Enter Item # search **81123**
2. This check works for both AP and Payroll.
3. The software required is version G of PROMPT Business System
4. In this release you will discover that the Printer Control File found at **PD** then **PC** has an added column headed HP Printer PCL Control Codes.
5. Also, the column "Form Type" accepts a new value of "LDS" meaning Laser Double Stub.
6. Here is what you have to do to use this Laser Checks feature.
  - a) Install an inkjet or laser printer preferably a Hewlett Packard 2300L
  - b) Go to **PD** and enter option **PC**
  - c) To print AP Double Stub checks at 10 CPI change "Access Key" **#BAPENTQ** to have "**LDS**" under Form Type and "**66**" as Page length
  - d) Of course, change the Printer Name to the inkjet or laser printer PROMPT printer name, for example CHEKPRTR or whatever name used
  - e) If you desire to feed checks from tray 2 enter the following Control Codes: **27 "&I1H"**
  - f) Add the code **27 "(s12H"** to print the check at 12 CPI
  - g) For Payroll change "Access Key" **#BPRPRT0** in the same manner.
